Alexandria, VA 22313-1450

Dear Sir:

Pursuant to 37 CFR 1.56, 1.97(c) and 1.98, Applicant for the above-identified application hereby submits legible copies of the following relevant arts as required by 37 CFR 1.98(c):

- Japanese Patent Application Laid-Open (Kokai) No. 10-166211 published in A. Japan on June 23, 1998;
- B. Japanese Patent Application Laid-Open (Kokai) No. 8-168916 published in Japan on July 2, 1996;
- C. Japanese Utility Model Application Publication No. 7-27703 published in Japan on May 23, 1995; and
- D. Japanese Patent Application National Publication No. 2000-517251 published in Japan on December 26, 2000.

The above-listed prior art, A and B, are in Japanese, and the English translation of each one of these prior art is not available at this time to the undersigned. However, an English language abstract of each of these prior art, A and B, is attached to the copy thereof. In addition, an English translation translated by a computer is attached to each one of these non-English prior art.

Since prior art C is not in English and no English translation or English language abstract is available at this time to the undersigned, a concise explanation of the relevance of each of these prior art is presented below pursuant to 37 CFR 1.98(a)(3):

Prior art C discloses a tool equipped with a cutting oil supply passage, and this tool (14) is comprised of a cutter portion (12), a shank portion (13) and a sleeve (15). The shank portion is fixedly covered by the sleeve (15) which is formed with grooves (16) that extend in the axial direction of the sleeve for the entire length of the sleeve. The grooves form a cutting oil supply passage (17) between the sleeve and the shank portion so that cutting oil is supplied toward the surfaces of the cutter portion of the tool.

Though prior art D is not in English, it is accompanied by the corresponding PCT publication which is in English. Accordingly, pursuant to MPEP Section 609, the requirement for a concise explanation of the relevance is satisfied, and an English concise explanation of this prior art is omitted herein.

The fee for \$180 required by 37 CFR 1.97(c)(2) and set forth in 1.17(p) is enclosed.

In view of the above, it is therefore respectfully requested that the Patent Office make a record of these relevant arts and consider them.

Respectfully submitted,

KODA & ANDROLIA
